Model: Labrie Automizer, Expert T and Wittke

Subject: Joystick Change

A new joystick, LabriePlus part number PNJ01075, has been introduced, replacing LabriePlus part numbers PNJ00975-02, PNJ00975-03 and PNJ00975-04. Any orders for these previous part numbers will automatically be updated to the PNJ01075 joystick assembly.

This is a plug-and-play replacement part, requiring no modifications or alterations. The new PNJ01075 joystick features a more compact lower housing, to accommodate various chassis installations. As an enhanced safety feature, the wiring has also been updated to require activation of the deadman switch for operation of the gripper control buttons.

To ensure safe operation and to minimize the potential for damage to the system, the deadman switch should never be held in a depressed position by the use of rubber bands, tape or any other means other than the Operator's hand.
