Model: All with IFM Multiplex Control System

Subject: Control Switch Covers

The IFM multiplex control system used in the Labrie and Wittke products use pictogram-style identification on the switches and indicators. The individual switch covers may be ordered to replace any that are worn or damaged. The following page illustrates the various switch covers, with associated part numbers.

These covers fit the ELB05000-A and ELB05100-A switch pack modules. Please note that the switches themselves integrated into the switch pack module, and cannot be ordered separately.

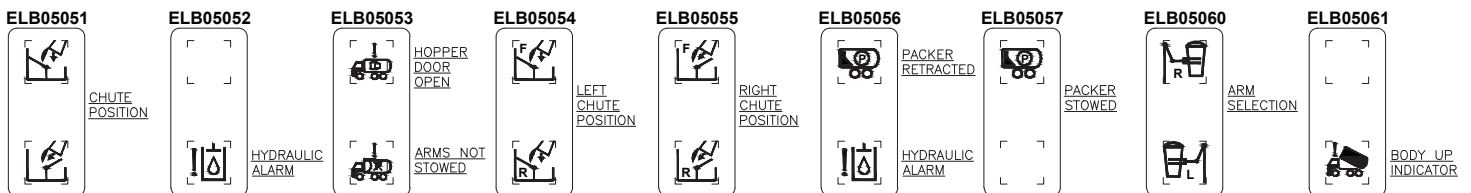

Please contact LabriePlus at (800) 231-2771 with any questions or for further information.
