Subject: Fuel Transfer (Defueling) Hose Assembly SERV02150

A hose assembly to allow the transfer of CNG fuel from one unit to another, part number SERV02150, is available through LabriePlus. The assembly includes the hose, connectors and valves necessary to safely and efficiently transfer fuel and/or defuel the CNG system.

The SERV02150 CNG Transfer Hose Assembly is intended for connection between the vehicle slow-fill ports. Please thoroughly review and understand the Labrie CNG Fuel Safety, Maintenance and Service manual, part number 177726, for instructions and safety considerations regarding the defueling/fuel transfer procedure. This manual may be downloaded by registered users on the LabriePlus website, www.labriepplus.com. Fire and environmental regulations for the local area must also be observed for this procedure.

SERV02150

Please contact LabriePlus at (800) 231-2771 with any questions or for further information.
