Subject: Muncie A20 PTO Introduction

For 2021, Muncie Power Products has introduced the A20 series PTO to replace the discontinued CS20 through CS24 and MC1 models. **Note:** Installation of an A20 model in place of the previous units may not be a direct replacement due to driveshaft length and/or married pump brackets that may require modification. Consult LabriePlus Technical Support with any questions relating to implementation.

The following chart outlines the previous Labrie part numbers as well as the superseded equivalent of the new model.

Discontinued CS20-24 Labrie P/N	Discontinued MC1 Labrie P/N	Current A20 Labrie P/N
