Model: ALL

Subject: Electrical Schematic Information

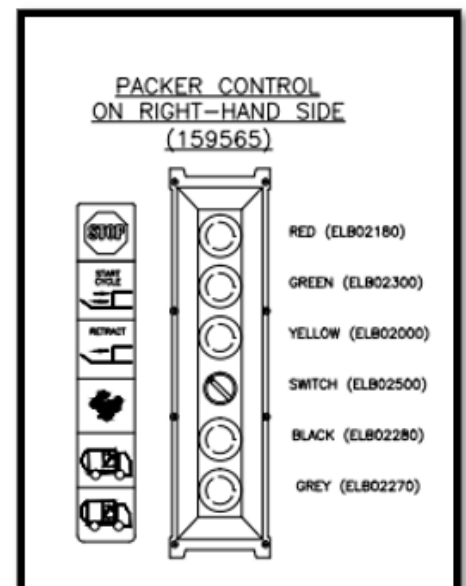

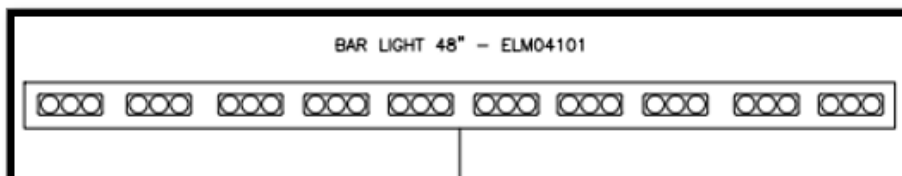

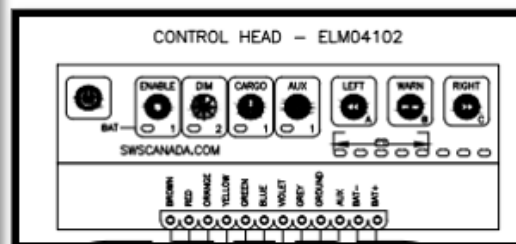

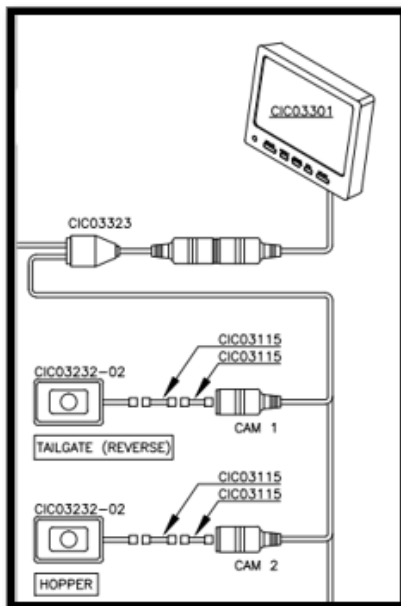

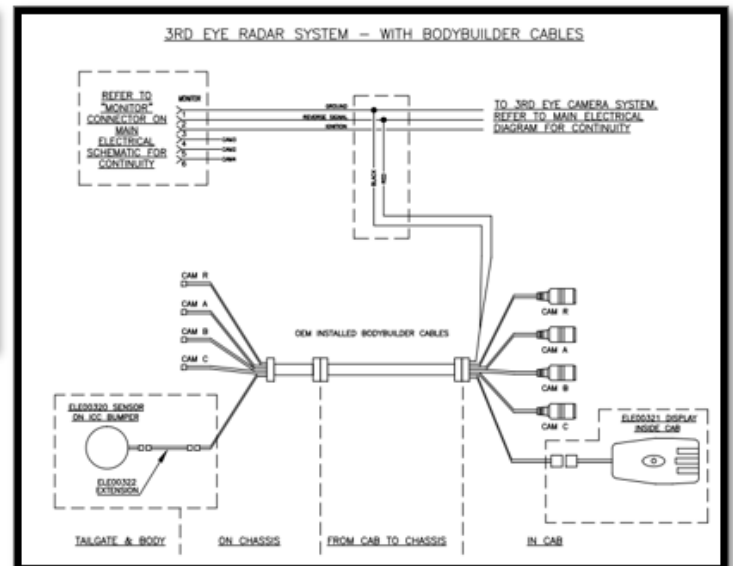

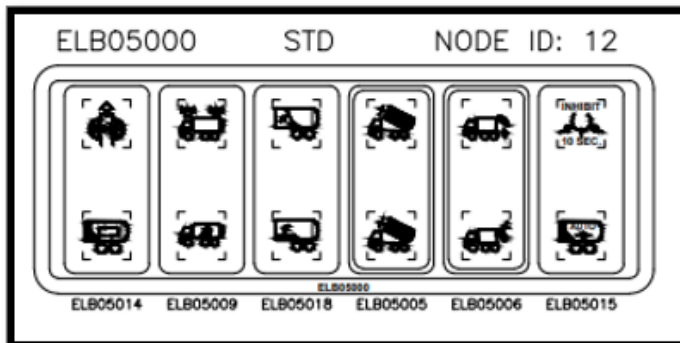

Electrical schematics are great tools for troubleshooting, servicing, or referencing with the LabriePlus Team. Labrie electrical schematics are body serial number specific. However, each schematic has similar information. Schematics include harness part numbers, component part numbers, wire ID, connector ID, Node ID, and options that were installed by Labrie.

Below are cutouts showing examples of information on a Labrie electrical schematic.

Please contact the LabriePlus Service Department at **(800) 231-2771 (US)** or **(877) 452-2743 (CAN)** for questions or further information

Labrie installed optional items will be displayed at the bottom pages of unit specific electrical schematics. Items included could be camera systems, lighting components, auxiliary controls, CNG controls, scale systems and button pack layouts.
