Subject: Labrie Electrical Connectors

All Labrie products utilize Deutsch style connectors in their electrical systems. Deutsch style connectors are a type of electrical connector known for their durable and reliable connections even in harsh and challenging weather conditions. They feature a rugged thermoplastic housing (usually a plug and receptacle) and oxidation-resistant terminals. Also, Deutsch style connectors come in a wide range of shapes and sizes, accommodating different wire gauges, thus making them versatile options for connectors.

Labrie uses Deutsch style products manufactured by Amphenol. Shops that work on Labrie products should have tools and a variety of connectors on hand to repair damaged harnesses. On the following pages are a list of tools and supplies to keep on hand for such repairs. These can be sourced from either LabriePlus or any reputable electronic supply company.
